FOR IMMEDIATE RELEASE

GER Awarded GSA Schedule 70 Contract

GER has been awarded an Information Technology Schedule 70 contract by the U.S. General Services Administration (GSA), the procurement arm of the federal government.

Augusta, Georgia February 18, 2015: Global Emergency Resources, a software solution developer and integrator for the emergency response and healthcare Industries, today announced that it has been awarded an Information Technology Schedule 70 contract by the U.S. General Services Administration (GSA), the procurement arm of the Federal government. The five-year contract allows for Federal customers to efficiently purchase the wide range of GER products and services. The GSA establishes long-term, government-wide contracts with commercial vendors to streamline and standardize the process of procuring products and services for the entire Federal government. GER's inclusion as a GSA Schedule 70 vendor enables all government agencies to obtain software products, support, training, and consulting services at approved pricing and with license terms from a trusted vendor.

The GSA Schedule 70 award is the culmination of a rigorous process in which the GSA carefully evaluates companies to determine their proficiency and suitability for providing products and/or services to the Federal government. The assessment covers an array of a corporation's capabilities, including organizational structure, performance history, customer satisfaction, and other criteria. In awarding GER a GSA Schedule 70 contract, the Federal government has determined that the company is recognized as a preferred vendor that is fully authorized to conduct business directly with Federal government agencies.

"GER is very pleased to make our services available through the GSA," said Erika Bobbitt, President of GER. "By reducing the procurement challenge, our GSA Schedule 70 contract helps GER and prospective government clients focus on what matters most, efficiently assessing and resolving critical IT challenges."
