

PATIENT TRACKING™

FAST, SECURE AND RELIABLE PATIENT TRACKING

HC Patient Tracking™ offers first responders and healthcare providers a fast, secure and reliable way to gather critical data and share it throughout the emergency and healthcare systems in near real-time.

HC Patient Tracking™ is easily deployed & available for use in the event of mass casualty incidents, mass fatality incidents, evacuations, mass gatherings, hospital surge events, and daily 911 runs.

FEATURES INCLUDE:

- Compatibility with existing hardware & internet infrastructure.
- Web-based data retrieval; requires no software installation.
- Cross platform mobile capability including iOS, Android, and Windows 8.1.

- Operability with existing barcodes & triage tags.
- Easily customizable mobile data collection & web-based dashboard.
- HIPAA & HITECH compliant.
- Integration with other patient care and emergency data systems including most ePCR systems and JPATS.

ADVANCED FEATURES

Scan barcodes on triage tags or ID cards to create a record with time, date, and GPS location of encounter.

Responders can add patient information, video, audio and still images for a complete tracking record that accompanies the patient throughout the patient triage and care lifecycle.

FAST, SECURE, AND RELIABLE PATIENT TRACKING

HC Patient Tracking™ is a fast, secure, and reliable solution for first responders to gather vital data and share it throughout the emergency and healthcare systems in near real-time. It integrates seamlessly with HC Standard® to give emergency workers or staff the information they need to make timely and informed life-saving decisions.

HC Patient Tracking™ scans barcodes on triage tags or ID cards to create a unique patient record that includes time, date, and GPS location of each patient encounter.

HC Patient Tracking™ collects and shares patient information, video, audio, and still images in near real-time.

HC Patient Tracking™ has been used successfully in several facility evacuations and provides 100% accountability during patient or personnel movement. Whether the evacuation is scheduled or unplanned, HC Patient Tracking™ can track any kind of movement - patients, personnel, or pets.
